The Number the Dealer Shows You Is Not What the Truck Costs: How to Calculate the Real Price of Financing

Why the Monthly Payment Is the Wrong Number to Focus On The monthly payment is a cash flow number. It tells you whether you can keep the lights on week to week. It tells you almost nothing about what the truck actually costs. What the truck actually costs is the purchase price plus every dollar [...] The post The Number the Dealer Shows You Is Not What the Truck Costs: How to Calculate the Real Price of Financing appeared first on FreightWaves.

SONAR Sitrep: Housing affordability drags down key freight sectors

While a booming heavy-industrial sector has shielded certain segments, the broader housing affordability crisis is actively suppressing volumes across multiple shipping modes. The post SONAR Sitrep: Housing affordability drags down key freight sectors appeared first on FreightWaves.

Migrants rescued from burning trailer after South Texas smuggling chase

Law officers rescued 39 suspected undocumented migrants from a locked trailer that caught fire Thursday during a pursuit in South Texas. The post Migrants rescued from burning trailer after South Texas smuggling chase appeared first on FreightWaves.

Five people were killed and two injured in four separate freight train collisions over the past week, including incidents near San Antonio and Ypsilanti, Michigan. The post Freight train fatalities mount as 5 killed in four incidents across US appeared first on FreightWaves.

Manufacturing's recovery broadens as industrial demand leads the freight upcycle

The freight downturn that defined 2023 and 2024 has decisively reversed, and the May data clarifies the mechanism behind it: industrial production, rather than consumer spending or inventory restocking, is now driving the cycle. FreightWaves identified the inflection months ago. The latest readings from the Institute for Supply Management and the Logistics Managers' Index, corroborated [...] The post Manufacturing's recovery broadens as industrial demand leads the freight upcycle appeared first on FreightWaves.

Commentary: Why RPS is the most successful transportation startup ever

By Satish Jindel On Monday, FedEx Corp. spun-off its Freight division. What is left is the combined network of FedEx Express and FedEx Ground. It's an opportune time to remember that FedEx (NYSE: FDX) would be a distant third-place parcel carrier in the U.S. market without the acquisition of RPS as part of the \$2.4 [...] The post Commentary: Why RPS is the most successful transportation startup ever appeared first on FreightWaves.
